Dear colleagues

It is with great pleasure that we welcome you at the 13th Congress of the European Society of Contraception and Reproductive Health in Lisbon from 28 to 31 May 2014.

The main objective of Reproductive Health is that the population has a safe and satisfactory sexual life as well as the capacity to decide when and how often to have children. Despite the enormous progress in the access to safe contraception, it is estimated that more than 120 million women throughout the world wish to avoid pregnancy but do not practice effective contraception. There are many reasons for this: the healthcare services do not provide adequate support, information and methods of contraception are still not available in many places or options are limited.

Portugal was one of the last countries in Europe to legalise abortion and since then the mortality and morbidity regarding abortion is decreasing. We are an example of how a society can change.

At the Lisbon 13th ESC Congress whose theme is "Challenges in Sexual and Reproductive Health", we present and discuss the latest scientific information and knowledge regarding contraception as well as to promote the right of each individual's access to adequate health services and to be informed of methods of family planning.

Lisbon is a city that combines the charms of old times with modern state-of-the-art facilities. Here, you can enjoy visits to historical monuments, exciting cultural events, superb traditional cuisine amidst all the comforts of a modern city.

The proverbial warm and spontaneous hospitality of the city's inhabitants together with its gentle climate will combine to offer you a very warm reception to what promises to be a highly productive and very enjoyable and successful meeting.

Best wishes,

Teresa Bombas, Congress President Johannes Bitzer, ESC President

About Lisbon

Lisbon is known as the white city, thanks to its unique light. The clear light and the pleasant and mild climate allow for marvellous walks all over the city. The city has a beauty that extends beyond its famed monuments that can be experienced in the streets, embraced by all the senses.

PASSION FOR THE STREETS

The Bairro Alto is one of the most characterful and attractive neighbourhoods in the city. The Bairro Alto boasts boutiques and bars and is a place where people meet in an eclectic and multicultural atmosphere. Traditional restaurants nestle alongside cosy bookshops; tea rooms serving signature cakes vie for attention with funky design shops and the boutiques of the most respected Portuguese fashion designers.

The Carmo area has some of the most fascinating historical sites in the city, such as the Convent and Church of Carmo, which maintain their elegance and grandeur. Don't miss the Museu Arqueológico do Carmo, which houses a collection of artefacts from pre-historic, Roman, Medieval, Manueline, Renaissance and Baroque periods. Largo do Carmo was the site of important events in the 1974 Revolution. Carmo is connected to the Baixa by the Elevador de Santa Justa, another of Lisbon's icons. The Elevador, designed by a disciple of Gustave Eiffel, is open to the public and boasts impressive views over the Baixa Pombalina and the rest of Lisbon.

The Baixa (center) is the city's traditional shopping district where visitors can stroll around the streets and find dozens of shops offering a wide range of temptations. Rua Augusta is the main artery of the Baixa Pombalina leading north from Terreiro do Paço (known as Black Horse Square by the English), to the beautiful Praça do Rossio (Praça Dom Pedro V). Just north of Rossio, discover Avenida da Liberdade, which in the 19th century, was the favourite promenade for the Lisbon élite. Today, the Avenida is home to exclusive international boutiques to tempt and inspire.

Up the hill, after passing the viewpoints of Santa Luzia and Portas do Sol, there is the Castelo de São Jorge, where the history of the city began. This is one of the most visited monuments in the city, not only for its historical and cultural importance, but also for its magnificent views over Lisbon.

THE CALL OF THE SEA

Strolling down to Santa Apolónia to explore the riverside neighbourhood. Next along the riverside is the neighbourhood with the largest number of heritage sites connected with the Portuguese voyages of discovery: Belém. It was from the beach in Belém that Vasco da Gama set sail to discover the sea route to India and the grandiosity of the former empire can be sensed throughout the area.

One of the most imposing symbols of the city is here - the Mosteiro dos Jerónimos. The monastery church, the Igreja de Santa Maria de Belém, is a magnificent church. The tombs of Vasco da Gama and the epic poet Luís de Camões can be found in the church.

Also in Belém, on the river bank, is another marvellous Manueline monument, the Torre de Belém. Much more recent, but still invoking the grandeur of the Age of Discovery, is the Padrão dos Descobrimentos in Belém.

The Parque das Nações – the riverside venue for Expo98 - is ideal for all ages. Located in the eastern part of Lisbon, this extensive cultural, entertainment, residential and corporate complex is a focus of the city's cultural life.

The Lisbon Docas – west of the city centre -, particularly Alcântara, are a favourite meeting place for the people of Lisbon. Families, friends and people of all ages enjoy the river views and the wide variety of places to walk and spend time with friends. Café terraces, bars and restaurants bustle with the hubbub of people enjoying themselves.

Social programme

Wednesday, 28 May 2014 - 18:00 - 20:30
Opening Ceremony and Welcome Reception
All participants are warmly invited to join us for the Opening Ceremony. It will be an entertaining and eventful introduction to the congress. After the Opening Ceremony, we invite our delegates to attend the Welcome Reception. Attendance at the Opening Ceremony and Welcome Reception are complimentary for registered participants.

Friday, 30 May 2014 - Congress Dinner - 20:00
The 13th ESC Congress will not only be about science, but also about having a good time. Sign up for this event and enjoy a fantastic evening in the company of your friends and colleagues at Restaurant Kais. Restaurant Kais is housed in a late XIX century old warehouse, by the riverside, which was used to generate energy for Portuguese trams that still work in our days. Transport will be foreseen to the congress dinner venue from hotels: Vila Galé and Pestana Palace and from the roundabout Marquês de Pombal (between Rua Joaquim Antonio de Aguiar and Av. Fontes Pereira de Melo).
Dress code: business casual

Included in the fee for the Congress Dinner:
- Pre-dinner drink, wine, water and coffee during dinner
- Starter, main dish, dessert
- Two tickets for drinks at the dancing area

Saturday, 31 May 2014 - Closing and Award Ceremony - 12:00
The Closing and Award Ceremony will be held after the last session of the congress. During this Ceremony, presentations will be made to the winners of the Awards. At the end of the Ceremony we will say goodbye to Portugal and welcome the country hosting the next congress: Switzerland.

Scientific Programme

The Scientific Committee put together a high standard, well balanced scientific programme, offering current topics and excellent speakers.

The theme of the congress is: "Challenges in Sexual and Reproductive Health".

- Keynote lectures and keynote sessions are plenary sessions. Leading experts will present specific subjects.
- Congress sessions: in each of these sessions, experts will provide up to date information on a particular topic.
- Symposia will be the platform for the pharmaceutical companies.
- Workshops are meant as interactive sessions, introduced by experts in the field and followed by a discussion with the audience.
- Debate: is meant as an interactive session, introduced by two experts in the field (pro/con) and followed by an in depth discussion with the audience.
- Free communication sessions: a selection of the submitted free communications will be scheduled into separate free communication sessions.
- Poster presentations are chosen from the submitted abstracts and will carry equivalent scientific status to free communications in the programme.
- A Young Scientist session aims to provide a special platform for paper presentations by young scientists. The session is primarily targeted at Fellows and PhD students, but the only inclusion criterion is the age, <35 years.
- Joint Society sessions will discuss a specific item within their area of interest.
