

An introduction to the clinical and forensic management of adult complainants of serious sexual assault

22-23 January 2021, Online

Organisers

European Society of Contraception
and Reproductive Health [Ali Kubba]
Mater Dei Hospital, Malta [Michele Montanaro Gauci]
in collaboration with the British High Commission, Malta

Clinical Faculty

Dr. Bernadette Butler - King's College Hospital, London
Dr. Emmeline Brew-Graves - King's College Hospital, London
Dr. Sarwat Bari - Kent community health, UK

Objectives

Higher level learning outcomes
(which have been developed primarily for the clinicians)

Based on a trauma-informed approach, delegates/trainees will be able to:

- o Explain the presentation of sexual assault and rape in relation to an adult, whatever their age or gender
- o Describe the immediate and follow up medical needs and care of the complainant (victim)
- o Explain the approach to forensic medical examination, including obtaining samples and documenting injury and the modalities available to do so
- o Understand the requirements and content of a witness statement/report

The course is exclusively for Maltese Gynaecologists, other professionals and HCPs

**If an ESC member wishes
to discuss training courses,
