Estrogen free contraception Johannes Bitzer, Switzerland

Questions & answers

- **Do you know when the hyperK occurred? would you use it in women with renal insufficiency and if monitoring K+ what should be the intervals to check it?**
Renal insufficiency would be a contraindication.
- **Is there good data comparing bleeding irregularities between drospirenone only pill and the conventional POPs?**
In comparative studies the bleeding days and the days of unexpected bleeding were less.
- **What do you think about the possibility to use DOP as a endometrial protector in RHT?**
Angelique is a combined preparation with Drosp and Estradiol for MHT.
- **Are there any contraindications for DPN 4 mg?**
The contraindications are like for other POPs: Cirrhosis Liver severe Cat 3, Liver carcinoma Cat 4, Past Breast Cancer 3, Current Breast Cancer 4; Renal Insufficiency Cat 4.
